

David G. Long, Ph.D.

Brigham Young University:
Electrical and Computer Engineering Dept.
459 Clyde Building, Provo, Utah 84602
long@ee.byu.edu

voice: (801) 422-4383 fax: (801) 422-0201
<http://www.mers.byu.edu/long/long.html>

Education:

- 1989** **Ph.D. University of Southern California.** Electrical Engineering. Advisor: Prof. Jerry Mendel, Chair EE-Systems Dept.
- 1983** **M.S. Brigham Young University.** Electrical Engineering. Cum Laude.
- 1982** **B.S. Brigham Young University.** Electrical Engineering. Summa Cum Laude.

Experience:

- 1990-** **Brigham Young University.** Provo, Utah
- Professor of Electrical and Computer Engineering.* (1999-) Teach undergraduate and graduate courses in electrical engineering. Conduct research in spaceborne scatterometry, synthetic aperture radar, and microwave remote sensing. Mentor undergraduate and graduate students. Mentor new faculty. University, college, and department committee assignments.
- Associate Professor of Electrical and Computer Engineering.* (1994-99)
- Assistant Professor of Electrical and Computer Engineering.* (1990-94)
- Director, BYU Center for Remote Sensing.* (2000-) Coordinate, promote, and direct BYU interdisciplinary remote sensing activities across the University. Manage support staff. Develop academic support program.
<http://www.cers.byu.edu/>
- Head, Microwave Earth Remote Sensing (MERS) Laboratory.* (1991-) Direct research in microwave remote sensing. Coordinate research and laboratory resources among faculty and students. Manage the acquisition and maintenance of laboratory computer and microwave test equipment. Manage support staff.
<http://www.mers.byu.edu/>
- Principal Investigator.* (1990-) NASA, NSF, NOAA, and DoD sponsored research projects. Selected titles include "Boundary Layer Modeling of Surface Winds Using NSCAT Data," "Model-Based Wind Retrieval of Wind Fields Using Seasat Scatterometer Data," "High Resolution Imaging of Land and Ice Using SASS Data," "Research in Oceanic Air/Sea Interaction," "Geologic Applications of Small SAR," "Scatterometer Climate Record Pathfinder," "Application and Extension of the Scatterometer Climate Record Pathfinder," "MicroSAR for small UAV." Member of a number of NASA and international science teams.
- Instructor, BYU Education Week.* (1995-2005) Give 1-3 public lectures per year
- 1990-** **Consultant.** Technical expertise in scatterometer performance and design analysis, radar resolution enhancement, and radar remote sensing. Teach short courses.

- 1983-1990** **Jet Propulsion Laboratory, California Institute of Technology (JPL).**
Pasadena, California.
- Experiment Manager, SCANSAT Project.*** (1989-90) Senior manager responsible for all technical and programmatic aspects of the SCANSAT Project in the development and proposal phase. Eventually known as *SeaWinds*, this highly successful \$250 M project resulted in two successful launches and one extended mission (*SeaWinds-on-QuikSCAT*: 1999-present). Managed and coordinated all JPL design and development efforts among staff spread over multiple disciplines at JPL. Prepared and negotiated budgets and technical requirements between JPL, NASA headquarters, other NASA centers, and contractors.
- Project Engineer, Spaceborne Scatterometer Projects Office.*** (1988-90) Senior technical manager for the JPL scatterometer projects office. Responsible for the high level design, analysis, and technical management of the scatterometer projects including instrument design and fabrication, algorithm development and coding for the ground processing system, mission operations, calibration data analysis, system performance analysis, and development and maintenance of system and low-level requirements. Supervised Project Engineering staff. Managed large multi-disciplinary design team. Functioned as interface between scientists, engineering support teams, and upper management.
- Group Leader, Radar Systems Engineering.*** (1988-90) Supervised a staff of 5 radar system engineers involved in the design and performance analysis of JPL flight projects in spaceborne radar remote sensing including the SIR-C and Magellan synthetic aperture radars and the NSCAT, NUSCAT, and SCANSAT scatterometer missions. Responsibilities included personnel hiring, task assignment, project reporting, and managing and negotiating budgets.
- Principal Investigator.*** (1989-90) NASA-sponsored research project “Model-Based Wind Retrieval of Wind Fields Using Seasat Scatterometer Data.”
- Member Technical Staff.*** (1983-1987) Developed requirements and the high-level design for the NASA Scatterometer (NSCAT) project as the NSCAT Instrument Systems Engineer. Developed performance analysis tools and performed tradeoffs in developing the onboard signal processor design and the ground processing system. Managed technical development in supporting disciplines.
- 1982** **ESL, Inc.** Sunnyvale, California (summer hire)
- Member Technical Staff.*** Studied the effects of bit errors in digital communication channels on the intelligibility of LPC-coded speech.
- 1980-1981** **Timet Corp.** Henderson, Nevada (summer hire)
- Engineer.*** Designed custom analog and digital control systems for high-power vacuum arc furnaces and molten salt electrolytic cells.

Publications:

Seventy-on refereed journal papers and three book chapters. Over 250 conference papers and technical conference presentations. Co-authors include distinguished scientists, faculty members, and students.

Awards:

- 2005** **IEEE *Best Paper of the Year, Trans. Geoscience and Remote Sensing.*** With David W. Draper.
- 2004** **BYU *Sponsored Research Award.*** For outstanding achievement in scholarly activities funded by external sponsors.
- 2004** **Utah County Sheriff *Citizen Service Award.*** For contributions to search and rescue activities.
- 2002** **BYU *Karl G. Maeser Excellence in Research and Creative Arts Award.*** For outstanding research and creative accomplishments.
- 2001** **BYU *Martha Jane Knowlton Coray Professorship.*** To acknowledge senior faculty who are outstanding scholars, teachers, and university citizens.
- 2000** **NASA *Group Achievement Award.*** For outstanding performance in the development, launch and operations of the Quick Scatterometer spacecraft.
- 1997** **NASA *Team Recognition.*** In recognition of proficient advice on scientific requirements during the development of the mission, successful development of methods for optimal data retrieval and outstanding early demonstration of scientific application of NSCAT observations.
- 1986,'88,'91,'91,'92** **NASA *Certificate of Recognition.*** For technical papers on scatterometer instrument design, analysis, and data processing.
- 1986,'88** **NASA *Certificate of Recognition.*** For the development of a sophisticated computer graphics package which was commercially distributed by NASA's Computer Software Management and Information Center (COSMIC). The package was among the center's most popular program packages for several years.

Research Interests:

Microwave remote sensing, spaceborne scatterometry, synthetic aperture radar, speech and signal processing, radar theory, estimation theory, computer graphics, resolution enhancement, scattering theory, polar ice, and mesoscale atmospheric dynamics.

Society Memberships:

Senior Member IEEE (nominated for Fellow), American Geophysical Union, and Tau Beta Pi, Eta Kappa Nu, Phi Kappa Phi, and Sigma Xi honor societies. Currently faculty advisor for Eta Kappa Nu. Past faculty advisor for Tau Beta Pi.

NASA Science Teams:

Past or current member of science teams: *NASA Scatterometer, SeaWinds, Ocean Vector Winds, TRMM, JASON-1, and ESA ERS-2.* Chair of the NSCAT model function subcommittee. Chair of the QuikSCAT/Seawinds Committee on Model Functions.

Students:

One post-doc, eight Ph.D. students completed with five currently in progress, 25 Masters students completed with five in progress. Completed students work in academia, in industry and for government laboratories. Numerous undergraduate students were also mentored as research students.

Major Research Grants:

Over 30 externally funded research grants totaling approximately \$7M. Sponsors include NASA, NSF, DoD, and NOAA.
